

NEDGROUP HOSPITAL AND SAVINGS PLAN

A clinically relevant motivation is required when prescribing any product which does not appear on this list.

Chronic application forms must accompany all first-time applications. All applications MUST include valid ICD10 codes.

Risk Equalisation Fund criteria must be met.

The formulary is subject to regular review. SCRIPTPHARM RISK MANAGEMENT reserves the right to update and change the formulary when new information becomes available or when new medicines are released.

PLEASE TAKE NOTE OF THE FOLLOWING:

Oxygen will only be considered for bronchiectasis and COPD in severe, advanced disease.

For diabetic patients, the following limits apply. Please provide a motivation if a higher quantity is required.

Lancets	Max 30 per month allowed
Glucose Monitoring Strips	Max 50 per month allowed
Needles	Max 30 per month allowed

Insulin syringes will only be considered on motivation. Pensets or penfills are recommended.

Interferons for Multiple Sclerosis will only be considered upon receipt of a clinically relevant motivation including history of therapy and expanded disability status scale report (EDSS)

Treatment for hyperlipidaemia is subject to criteria for lipid-lowering therapy being met. Assessment required completed Risk Evaluation report as well as diagnostic and latest lipograms including LDL cholesterol levels.
