30 March 2022

Dear Polmed Pharmacist

POLMED VITAMIN FORMULARY 2022

The Polmed Medical Scheme strives to ensure that their members have access to medicine benefits to support their daily healthcare needs. In the pursuit to deliver quality and cost-effective healthcare, Polmed has introduced a new vitamin formulary for 2022. Kindly note that only the medication on the formulary attached will be funded by the Scheme.

The vitamin formulary is designed to cover cost effective vitamins and minerals up to a maximum quantity of 60 tablets per beneficiary per month or 360 tablets per beneficiary per year. This is subject to the member's available Over the Counter (OTC) medication benefit or acute medication benefit if prescribed by their doctor. It includes multivitamins as well as single vitamins and minerals such as vitamin C, zinc and omega fatty acids. No authorisation is required for the member to access these vitamins.

Attached is the 2022 Polmed Vitamin formulary, also available on the Polmed website. The formulary will be reviewed periodically to ensure that the most appropriate items are included to align with the scheme's wellness initiatives and updated from time to time depending on market prices and availability of products.

Kind regards
